

Nanoscience Discovery Lab

Summer Academy, June 29 – July 10, 2009
9AM-3PM

Application Due by May 15, 2009 by Email to smh5@rice.edu

A two-week Science Academy for 9th & 10th grade students involving active outdoor field work and hands-on laboratory testing

Through a structured science fair workshop, students learn how to construct and test a hypothesis in nanotechnology and environmental science

Rice University faculty and water quality expert, Dr. Mary McHale teaches students how to analyze local water samples from various sources for impurities.
